ENVIRONMENTAL RESPONSIBILITY

Nature provides the raw materials for our products, which is why we feel a close connection to wood as a renewable resource and a responsibility for the forest ecosystem. The wood used in our particle boards for furniture production is untreated and sourced from small-diameter trees and windfall timber at sustainable forestry operations in the region. The resulting low-emission products protect your health and the health of the environment. Our commitment to long-term environmental goals earned us the German Sustainability Prize in 2014.

GENUINELY GOOD WORK

As a family business, we look back on more than 120 years of proud tradition in craftsmanship that has shaped our company history. What began as a small carpentry business grew to become one of the largest manufacturers of bedroom and storage furniture in Europe. The driving force behind our success was a steady commitment to the pursuit of quality in our craftsmanship by talented experts in a region with a passion for building furniture. The result is furniture made at the highest level of technical expertise.
